## World Geography

### Unit 3 – Earth’s Human Geography

### Study Guide

A study guide is for your benefit. It gives you an outline of what you need to know for the test. *Completed* study guides are a required assignment in this class and are due on the day of the test.

#### **\*Know and understand the terms.**

1. Study the population density formula; you will be required to figure out average population density per square mile on a variety of places.
2. What is one reason why more than 81 percent of the Earth’s population lives in Asia, Europe, and North America?
3. Why is population distribution uneven?
4. What types of areas do people want to live in?
5. What does a country have if it has a high population density?
6. What do demographers figure out when they compare birthrates and death rates?
7. Since there has been an increase in food supply and better medical care, what has the world’s population done?
8. What is one problem faced by the world’s population today?
9. What do demographers use to explain the reasons for immigration?
10. Why did many people leave Vietnam for the United States?
11. Why do many people leave the country (rural area) for the city (urban area)?

#### **Essay Questions:**

12. What problems might come about because of the world’s rapidly increasing population? Use facts from the chapter to support your answers.
13. How does the “push-pull” theory explain immigration? In your answer tell what the theory is.
