

World Geography
Earth's Natural Resources
Environmental 3-D Report
Unit 4 Project

As a culmination of our study of the Earth's Natural Resources, you will be creating Environmental 3-D Reports to display your knowledge.

Task:

1. Choose a topic from the list provided
2. Trace and cut out, on poster board, the shape pattern provided (You will need three of them)
3. Fold each shape in half with the writing on the inside (left to right and right side up)
4. Next, you will glue until the last shape is attached to the first one, thus creating one large, standing 3-dimensional display.
5. Projects might be displayed in the library, so do your best work!

Requirements:

- Once you have chosen your topic, break it down into three subtopics
- Research information and list five facts (in complete sentences) for each subtopic
- Create an attractive title for each subtopic
- Draw, cut out from a magazine, or print from the Internet, a picture that illustrates each subtopic
- Include a separate page listing all of the sources you used to find information (you must use at least one library book and your textbook at least once for your research)
- Use color and your imagination!

Due: _____

Worth: 50 points
