World Geography

Unit 6 – Africa's Physical Geography

African Travel Scrapbook Project

For the following project you will be required to create a travel scrap book of your travels and adventures in one of the following regions of Africa:

1. North Africa
2. West Africa
3. East Africa
4. Central & Southern Africa

You will also be given a list of important facts about your region. Imagine that you have gone on a trip to that part of Africa! As you travel there, you will record your observations, experiences, and what you encounter while you are there.

The following objectives **MUST** be included in your travel scrapbook:

1. Names of the countries in the region you visited.
2. Landscape and climate patterns in that region.
3. Natural resources and economic activity of that region.
4. Important rivers and landforms you saw in that region.
5. The kinds of activities that you engaged in.
6. Difficulties that you encountered while traveling there.
7. Particular sights that were incredible and any traveler will not want to miss.

Dedicate one page to each objective. Make sure you write as if you are really traveling there. Include at least one picture (from magazines, the Internet, or your own drawings) for each page. Each *thoroughly discussed* objective earns you 6 points. You will also be required to include a cover page that has: a title, a picture, and your name on it. The cover page is worth 3 points.

Make sure you read and follow all directions. Be creative and learn! This activity is worth 45 points.

Due _____.
